

Cardiology TOE/TEE

Transducer
covers

Kits

Bite guards

The Probetection™
line includes
non-sterile and
sterile ultrasound
transducer covers
and kits for (TOE/TEE)
transducers.

Palmedic provides a complete line of protective covers for ultrasound transducers under the name Probetection™. Probetection™ protects patients and professionals against cross-infection guaranteeing optimal hygiene.

Probetection™ TOE covers PU (Latex free)

The Probetection™ line includes non-sterile and sterile ultrasound transducer covers. Especially designed for Trans Oesophageal or Trans Esophageal Echocardiography (TOE/TEE) transducers for adult, paediatric and neonatal patients. The Probetection™ products are available as a single packed cover, or as a single packed cover on an applicator.

Probetection™ TOE kit PU (Latex free)

The Probetection™ line includes non-sterile and sterile ultrasound transducer kits. Especially designed for Trans Oesophageal or Trans Esophageal Echocardiography (TOE/TEE).

Probetection™ Bite guards PP (Latex free)

Providing a safe passage through the patient's mouth. Protecting both patient's teeth as well as your valuable ultrasound probes and endoscopes. Suitable for adult, paediatric and neonatal patients.

time saving and cost effective

less risk of cross contamination

less damage & less downtime
