

Urology/Gynaecology

Ultrasound transducer covers

ProbetectionTM probe covers provide a perfect fit and protection for all existing brands and models of transducers used in gynecology and urology.

Probetection™ probe covers provide a perfect fit and protection for all existing brands and models of transducers used in gynecology and urology.

Probetection™ Latex

The Probetection™ transducer covers offers optimal fit for all of the trans-vaginal and trans-rectal transducers currently in use. All our transducer covers are individually packed available sterile and non-sterile.

Probetection™ PI (Latex free)

For these particular gynecology & urology procedures Palmedic offers a complete line of ultrasound transducer covers to protect the patients and healthcare workers against cross contamination.

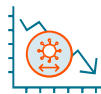

Probetection™ PU (Latex free)

The use of trans-rectal transducers typically requires two different covers. One of these is a sanitary cover, the other is a water stand-off cover for near-field visualization. The Probetection™ line of rectal transducer covers offers both types to facilitate the correct use of transducers in this application.

time saving and
cost effective

less risk of cross
contamination

less damage &
less downtime
